

Dart Control Flow Statement

This statement are used to control the flow of Dart Program.

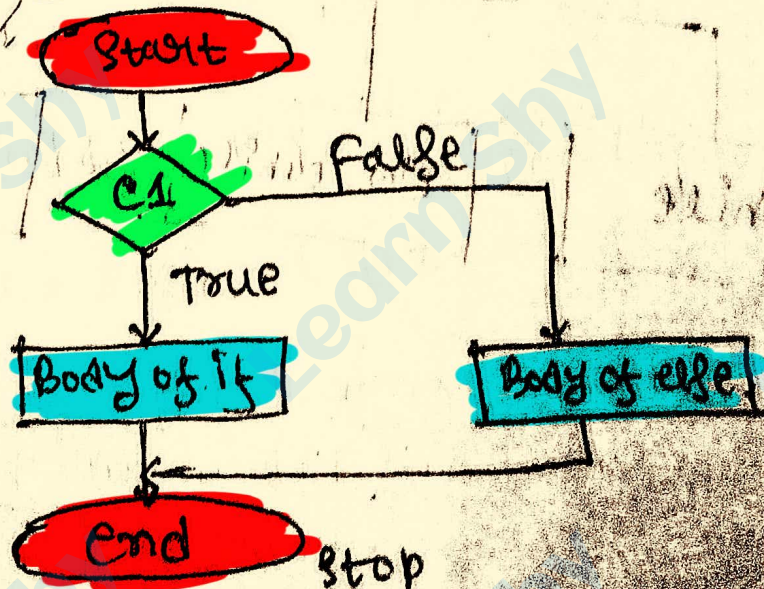

If Statement

An If statement is a programming conditional statement that, if proved true perform a function or display information.

If - else Statement

executed when the given condition is true. and if false, else-block is executed

else-if Statement

It is very useful when we use Multiple condition.

1. write a program to print the result based on the student's marks.
2. write a program to find the greatest Number.

Switch case Statement

Alternative of if else

```
Switch (variable-expression) {
```

```
Case constant expressions: {  
    // Statement;
```

```
}  
break;
```

```
Case Constant exp-2: {  
    // Statement;
```

```
}  
break;
```

```
default: {  
    // Statement;  
}  
break;
```

```
}
```
