1) Data types

Data types are the most fundamentals feature of Programing language.

The data types specifies what type of value will be stored by the variable. Each variable has its data-type.

Dart is static data type of language which means that the var can't modify.

1) Number ✳

2) String ✳

3) Boolean ✳

4) Lists. ✳

5) Maps ✳

6) Runes

7) Symbols.
